

Bell System is pleased to announce the launch of the new **bellini** range of door entry surface mounting panels. These new stylish panels can be considered as an elegant alternative to the traditional SPA series of panels.

The **bellini** panels are designed for installations at low-rise apartments, maisonettes and conversions making them an ideal choice for the private building sector and property developers. The range currently includes audio, audio combined with a keypad and video panels.

All panels are manufactured from anodised aluminium in a contemporary design and have black plastic trims with contrasting chromed pushbuttons and speech grill. The front panels are hinged from the back box for ease of installation and the hinges can easily be changed from one side to the other to assist in tight locations

## bellini panel range

Model BLP2  
Audio Panel

Model BLP106-3  
Combined Panel

Model BLVP8  
Video Panel

The front panels are hinged from the back box and the hinges can easily be changed from one side to the other to assist their installation in tight locations.

The bellini video panels include a protected CCD colour camera for connection to the bellissimo video system.

The bellini audio combined panels include an integral model C106 keypad for a residents' coded access facility.

Optional nameplate illumination is available with the model BLP-LAMP lighting module.

Panels do not include the speech unit and a model 61 speech unit should be ordered with each panel.

The bellini panels can be purchased independently or as part of a packaged system. Three styles of panel are immediately available;

- Audio panel; 1, 2, 3, 4, 6, 8, 10 and 12 buttons
- Audio and video panel; 1, 2, 3, 4, 6 and 8 buttons
- Audio panel with integral keypad; 1, 2, 3, 4 and 6 buttons

Innovative hinged assembly for ease of wiring

Bellini Panel Dimensions (mm) panels up to 3 buttons are single pushbuttons, panels above are double pushbuttons.
